

**AIDS 2008 CONFERENCE, MEXICO CITY
AUGUST 3-8, 2008**

Satellite Session Title:

**Coordinating HIV vaccine research and development efforts:
Fulfilling the goals of the Global HIV Vaccine Enterprise through country-
regional- and network-level approaches**

A Canadian HIV Vaccine Initiative (CHVI) satellite session, co-sponsored by the Government of Canada and The Global HIV Vaccine Enterprise, will inform you about collaborative and concerted global efforts being made regarding HIV vaccine plans and research and development.

Date: Sunday August 3, 2008

Time: 11:15am – 1:15pm
(preceding the official International AIDS Conference opening)

Venue: Centro Banamex, SBR 7
Mexico City, Mexico

Summary:

The global need for a safe and effective HIV vaccine has resulted in HIV vaccine plans being created world-wide and partnerships being established to fund HIV R&D research. During this session, speakers will inform the audience about global perspectives of the HIV vaccine landscape, profile their country-, regional-, and network-level HIV vaccine strategies and investments in HIV vaccine research, and share their lessons learned in HIV vaccine research and development.
