

→ Progress in VMMC Scale-up in Priority Countries

As of July 2014

Experts hope to circumcise more than 80 percent of men in 14 African countries to reduce their risk of HIV infection

Circles show the number of circumcisions needed to reach 80 percent goal

■	Circumcisions completed in 2013:	2,658,566
■	Circumcisions completed in 2012:	1,710,845
	2011:	884,283
	2010:	422,924
	2009:	122,988
	2008:	21,310
