

Save the Date: HIV R4P 2018 Satellite Session

PLANNING FOR SUCCESS: NEXT STEPS FOR DAPIVIRINE RING

Sunday October 21, 2PM-5PM (Madrid, GMT+2)

Located in the Burdeos Room of the Madrid Marriott Auditorium Hotel

The monthly dapivirine ring has the potential to be a promising tool in the fight against HIV. As the first long-acting HIV prevention product designed specifically for women, it could enable more women to take control of their sexual health and provide a new option for women seeking HIV prevention. Join us to learn the latest on dapivirine ring research and help us prepare for the ring's potential introduction.

Agenda:

Session 1:

Research and Modeling

Session 2:

Opportunities & Challenges for Ring Introduction

Session 3:

Planning for Introduction

A Conversation With:
