

# Project seek to create demand on PrEP

**Objective 2.** Strengthen and support ongoing efforts for the integration of PrEP into HIV prevention programs, policies, and services, as well as sexual and reproductive health and rights and ANC services, as stated in the South African PrEP National guidelines

**Engagement with all District, Provincial and National Departments of Health officials**  
The goal here is to ensure that PrEP is integrated as another option of HIV prevention in all public health care facilities

**Join district and provincial PrEP TWGs**  
Advocate for a space on different PrEP task forces or technical WGs at provincial and district levels to ensure representation

**Sensitization meetings with SRH service providers**  
The goal is to ensure that the call for integration starts at service levels

- What I got from Fellowship**
- Ownership of programme
  - Good planning with clear directions and constructive
  - More research and updated information on HIV biomedical prevention and current studies, also good networking and partnership

**Mapping of key players and processes in PrEP programming at national and district levels**  
Key players and processes will be mapped in seven districts. This activity will also ensure that the Fellow and her allies get acquainted with the processes, timelines, activities and of ongoing and/or planned PrEP programming

**Objective 1:** capacitate young women in TAC to understand PrEP and advocate for access to it in all public health facilities.

**Build, nurture and strengthen a cadre of champions among adolescent girls and young women**  
This is aimed at creating agency among young women to push for integration of PrEP into broader HIV and SRH services.

**Attend weekly TAC branch meetings**

These are held weekly in different districts to do education around PrEP and why we need to advocate for a national roll out of it in all public health care facilities

**'Sensitization and consultative meetings with young women'**  
These are aimed at empowering young women on issues of PrEP within the 7 districts. TAC has branches in totalling 33 branches that are mainly dominated by young.

**PrEP materials development**  
Develop key materials to support the awareness-raising and education initiatives and to help in demand creation for PrEP among young women

**Objective 3.** Preparation of TAC for new options including Long Acting Injectable (LAIs), Dapirivine Rings and MPTs

**Organize information sessions and consultative meetings**

These will be at community/district levels with young women in the TAC spaces on the dapirivine ring, LAIs and MPTs in order to develop areas/actionable points for advocacy

**Convene civil society meetings on ring/LAIs/MPTs**  
The goal is to update them and get buy in on the dapirivine ring, long acting injectables (LAIs) and MPTs to enable them to prepare plans, actions, needs assessment of gaps and to help prepare for this and more fully engage in the discussion around future options

**Ring/LAI/MPTs materials development**

Work with ring/LAIs/MPTs advocacy on those interventions, young champions to develop materials such as brochures, articles, blogs to support our

**Stakeholder engagement**  
This is broader stakeholders engagement including policy makers, regulators, service providers etc to enhance conversations on potential dapirivine ring approval and guidelines development
